RESPONSE TO AMENDMENT

REJECTIONS REPEATED

1. The 35 U.S.C. §102/§103 rejection of claims 1-6 as anticipated or over Gibson et al. (H1261) is repeated for reasons previously of record in paper #12, pages 2-4, paragraph #4.
2. The 35 U.S.C. §103 rejection of claims 7-10 over Gibson et al. (H1261) is repeated for reasons previously of record in paper #12, page 4, paragraph #5.

ANSWERS TO APPLICANT'S ARGUMENTS

3. Applicant's arguments filed in paper 13 regarding the 35 U.S.C. §102/§103 and §103 rejections as anticipated or over Gibson et al. (H1261) of record have been carefully considered but are deemed unpersuasive.

Applicant argues that there is entirely insufficient recognition in the reference that the spatial angle at which the reinforced pipe member is subsequently put into service. The limitation in which Applicant is referring "for maximum effectiveness in withstanding applied internal stress when the reinforced pipe length is subsequently into service" does not alter the structure of the claim. It is held that a recitation with respect to the manner in which a claimed product is intended to be employed does not differentiate the claimed product from a prior art product satisfying the claimed structural limitations. This limitation does not specify a particular predetermined spatial angle of the reinforcement fibers different from that of Gibson. The fact that Applicant uses the predetermined spatial angle of the reinforcement fibers for a different

Art Unit: 1772

purpose does not alter the conclusion that its use in a prior art device would be prima facie obvious from the purpose disclosed in the reference.

Applicant further argues that there is a need to be significantly different spatial angles for applied reinforcement fiber for “maximum effectiveness.” This argument is not commensurate in scope with either claim 1 or claim 7. Both claims 1 and 7 merely recite “a predetermined angle.” They only require that the reinforcing fibers be wound at one angle, which Gibson discloses (see example 1). None of the claims that depend from claim 1 or 7 require the reinforcing fibers to be wound at more than one angle.

Applicant argues that Gibson uses a different process than the instant claimed invention. As stated before, the method of forming the product is not germane to the issue of patentability of the product itself. Further, when the prior art discloses a product which reasonably appears to be either identical with or only slightly different than a product claim in a product-by-process claim, the burden is on the Applicant to present *evidence* from which the Examiner could reasonably conclude that the claimed product differs in kind from those of the prior art. *In re Brown*, 459 F.2d 531, 173 USPQ 685 (CCPA 1972); *In re Fessman*, 489 F.2d 742, 180 USPQ 324 (CCPA 1974). This burden is NOT discharged solely because the product was derived from a process not known to the prior art. *In re Fessman*, 489 F.2d 742, 180 USPQ 324 (CCPA 1974). Furthermore, the determination of patentability for a product-by-process claim is based on the product itself and not on the method of production. If the product in the product-by-process claim is the same or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 227 USPQ 946, 966 (Fed. Cir. 1985) and MPEP §2113. The arguments of counsel cannot take the

Art Unit: 1772

place of *evidence* in the record. *In re Schulze*, 346 F.2d 600, 602, 145 USPQ 716, 718 (CCPA 1965); *In re Geisler*, 116 F.3d 1465, 43 USPQ2d 1362 (Fed. Cir. 1997) ("An assertion of what seems to follow from common experience is just attorney argument and not the kind of factual evidence that is required to rebut a prima facie case of obviousness."). See MPEP § 716.01(c) for examples of attorney statements which are not evidence and which must be supported by an appropriate affidavit or declaration.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
